

Slimy Science

Over 50 students in year 7-9 attended the start of KS3 Science club on Monday 13th June. Students were first shown how to make and customise their own slime before setting to work making their own. Students chose their own slime colour mix, whether to add shaving cream for sponginess and glitter for sparkles but it was the initial slime mixing which caused the most mess (sorry parents/carers!).

Science club runs every Monday with new members always welcome and new, fun activities planned each week.
